**5 recording modes**

KISTOCK can record in 5 different ways :

- **"Immediate"** mode records values according to a predefined interval.
- **"Minimum"**, **"Maximum"** and **"Average"** record automatically the calculation of minimum, maximum or average of measured values during an interval of recording.
- **"Monitoring"** mode allows to get an accurate history report during error events to help troubleshooting, without stopping the measurement logging. To proceed this way, you just have to define :
  - a record interval to be used whilst the readings are beyond the setpoints.
  - a record interval for the values measured during each reading beyond the setpoints.

Furthermore, you can also let your KISTOCK record non-stop ("**loop**" recording option).

**4 types of dataset start**

Once your recording mode has been set, you can launch your dataset :

- With a delayed start (with predefined date and time)
- With the software
- With push-button
- With **"Online"** option. In this case, your datasets are directly sent, saved and displayed on your PC in real time.

**6 types of dataset stop**

You can stop your dataset :

- According to a date and time (if it was started the same way)
- According to a period
- According to a predefined number of recording points
- Once the storage capacity is full
- With **"Stop"** option of the software
- By holding **"OK"** key during 5 seconds, if this function has been previously activated by the software

DISPLAY

**END** DATASET is finished.

**REC** Indicates that one value is being recorded.  
It flashes: the DATASET did not start already.

**FULL** Flashing slowly: DATASET is between 80 and 90 % of the storage capacity.  
Flashing quickly: DATASET is between 90 and 100 % of the storage capacity.  
Constant: storage capacity full.

**BAT** Constant: indicates that the batteries have to be replaced.

**ACT** Screen actualisation of measured values.

**MIN**  
**MAX** The displayed values are the maximum/minimum values recorded for the channels displayed.

**↑**  
**↓** Indicates the alarm action type: rising or falling action.

**°C** Temperature in °Celsius.

**°F** Temperature in °Fahrenheit .

**%RH** Relative humidity (KH 220).

**1** Indicates the channel number which is  
**2** measuring.  
**3**  
**4**
